📍 Chennai, India

SKILLS

CSS	React	GitHub
Data Structures	Blockchain	
Java	C/C++	JavaScript
Python	Node.js	Express.js
HTML	MongoDB	SQL
Git	Alteryx	Ethereum
Solidity	UI&UX	Figma

KEY ACHIEVEMENTS

-  **HackHazards Finalist**
Top 20 Finalist at HackHazards (Monad Track), competing against nationwide teams
-  **Hackathon Achievements**
Secured positions in the Top 10 in over 5 SRM University Hackathons
-  **Academic Excellence**
Maintained a high academic standing with a 9.57 CGPA

EDUCATION

Bachelor of Technology in Computer Science Engineering

[SRM Institute of Science and Technology](#)

📅 08/2024 - 05/2028

📍 Chennai, India

SUMMARY

I am a dedicated Computer Science undergraduate at SRM Institute of Science and Technology with a strong foundation in Data Structures, Backend Development, and Blockchain. Through multiple AICTE Virtual Internships and competitive hackathons, I have gained experience in building scalable solutions. I am passionate about leveraging AI and decentralized technologies to tackle significant global challenges

EXPERIENCE

AI-ML Virtual Intern

[Google for Developers – AICTE EduSkills](#) 📅 07/2025 - 09/2025 📍 Remote

- Implemented core Machine Learning concepts and predictive modeling workflows
- Explored real-world AI applications and enhanced problem-solving using data-driven approaches

Data Science Master Virtual Intern

[Altair – AICTE EduSkills](#) 📅 04/2025 - 06/2025 📍 Remote

- Executed end-to-end data science lifecycles, including preprocessing, statistical analysis, and visualization
- Applied visualization techniques to derive actionable insights from complex datasets

Data Analytics Process Automation Virtual Intern

[Alteryx SparkED-AICTE EduSkills](#) 📅 01/2025 - 03/2025 📍 Remote

- Developed automated ETL pipelines to optimize data cleaning and transformation processes
- Gained proficiency in business-centric analytics tools to streamline workflow efficiency

PROJECTS

Carbonly – Blockchain Carbon Credit Platform

📅 01/2023 - 04/2023 📍 Chennai, India

🌐 <https://carbonly-iota.vercel.app/>

A Blockchain-based platform focused on carbon credits

- Developed a decentralized marketplace for trading carbon credits to incentivize sustainability
- Enabled farmers to tokenize plantation efforts, providing a transparent revenue stream via smart contracts
- Tech Stack: Node.js, Express.js, MongoDB, Hardhat, Ethereum, MetaMask.

AI Health Chatbot

Engineered an ML-based chatbot that predicts potential diseases based on user-inputted symptoms. Integrated a machine learning model with a responsive UI to provide real-time, data-driven health suggestions.

Tech Stack: Python, ML Libraries, JavaScript
